NASA SEWP VI Solutions for Enterprise-Wide Procurement

Contract Holder

SEWP VI PROGRAM OVERVIEW

The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support—more than 50,000 orders a year.

FAIR OPPORTUNITY (FAR 16.505)

FAR 16.505(b)(1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool (QRT) is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP QRT will automatically include the Contract Holders within a selected Category or based on a suggested source.
